

Thank you for the purchase of the Matador Arms Flapjacks Range Kit.

INSTRUCTIONS

Important!!!

Always know your target and what is behind it!

As the range kit contains steel stands, we recommend always being 15 yards away when shooting .22 rimfire or pistol rounds.

Included

- 4 Flapjacks Targets (with hardware)
- 1 Ground Spike
- 1 Cross-T

Not Included

You will need to supply 2"x2" wood. It works best if you use two, 4ft lengths. This can be made by simply cutting a single 8ft length in half.

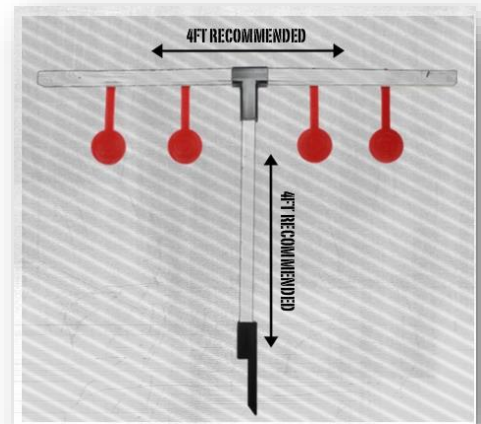

Step 1. Push the ground spike into the ground so that the 2" steel box is flush with the ground.

Step 2. Add your 2"x2" 4ft vertical upper. Make sure it is relatively steady. If it is not, then move it to more compacted ground. Avoid sand, or really loose dirt.

Step 3. Add the Cross-T to the vertical 2"x2".

Step 4. Add the 2"x2" 4ft cross. Evenly space both sides.

Step 5. Install the Flapjacks - you can use the supplied screws or zip ties.

Note: For takedown or transport, the Flapjacks will have to be removed if you wish to slide the 2"x2" back through the Cross-T.
